Welcome to the 2021 annual Engineering and Commerce Case Competition (ENGCOMM)

Through this experience, international engineering and business undergraduate students will have the opportunity to combine their respective expertise to overcome genuine industry challenges. To be successful throughout the competition, participants will have to showcase key skills such as creativity, time-management, attention to details, and communication. www.engcomm.ca

ENGCOMM 2021: 22ND to 27TH FEBRUARY, 2021

Every year, participants from universities across the world join the competition and spend an entire week where they engage in solving industry cases and displaying their skills for industry sponsors to see. The participants are the foundation of the competition, and as such they are selectively recruited. Group Application is open until January 14th, 2021 through apply@int.technion.ac.il

Why enter?
➢ Cross-Faculty Competition
➢ Diverse International Networking Opportunities
➢ Putting Classroom Knowledge to the Test
➢ Become a Storyteller
➢ Building Mental Toughness
➢ Represent Your University
➢ Participation grant in the amount of 500CAD

ACADEMIC INFORMATION

Over the course of the competition week, students will solve three cases, each combining business and engineering elements. During each case preparation period, delegations will have to read, understand, and provide a solution to the presented industry problem in the form of a fifteen-minute pitch supported by a visual presentation.

As the 2021 edition of ENGCOMM will be held online, students will use their own computers to navigate the internet, build a visual presentation, and present their solution by using a video conferencing platform. Competitors will be able to access all the necessary tools to develop solutions, perform calculations and designs if desired and make a presentation. RULES AND GUIDELINES
